Work Style

- Comfortable with remote collaboration & async workflows
- Clear written communication
- Self-managed, deadline-focused, and detail-oriented

Chibuzor Nnorom

CRO-Focused React & Next.js Developer (Remote)

Profile

Conversion-focused React & Next.js developer specializing in building high-performance web applications designed to influence user behavior and drive measurable engagement.

I combine UX psychology, performance optimization, and scalable frontend architecture to reduce friction, improve product discovery, and optimize user flows. Experienced working remotely with strong documentation, async collaboration, and independent execution.

Experience

Frontend Developer (Remote / Freelance)

2023 – Present

- Engineered conversion-optimized web applications using React and Next.js
- Designed and implemented user flows focused on reducing friction and improving engagement
- Built scalable, reusable UI systems aligned with product growth goals
- Optimized page performance, accessibility, and SEO to improve retention and discoverability
- Implemented form validation and state management patterns to reduce drop-offs
- Collaborated asynchronously with clear documentation and structured communication

Education & Training

B.Sc. Data Science (Undergraduate Studies — Coursework Completed)

Imo State University, Owerri, Nigeria — 2018
Completed coursework through final year

- Foundations in statistics, data analysis, algorithms, and Python
- Strong analytical and problem-solving background supporting software development

Data Science & Conversational AI

Coven Labs, Lagos, Nigeria — 2021

Art Direction

02 Academy, Lagos, Nigeria — 2021

Availability

- Open to remote, contract, or full-time international roles
